

David Pierce

David is another staff member who worked his way to ReStore through the Department of Human Resources Job Corps program by performing volunteer services. They suggested Bend Habitat as his next step and after two years, he knows he found a good “culture fit” at ReStore. He especially enjoys running the clearance warehouse and scheduling donation pickups.

He calls himself a “Jack of all Trades” with a wide range of interests. He enjoyed ten years in Health Care as Nurse Assistant. Recently he became the first in his family to obtain a college degree, a Bachelor’s in Business with a Minor in Political Science. He said it was in his mind to prepare for work with non-profit organizations.

“Self aware and persistent”, as he puts it, he likes to be meaningfully involved and enjoys people interaction. And so, as logistics coordinator here, he calls the favorite part of his job interacting with co-workers and customers.

Still, David treasures his quiet time and is extremely fond of reading material in a variety of fields.
